

## TRANS 75W-80

### UNIVERSAL SEMI-SYNTHETIC TRANSMISSION OIL.

#### SPECIFICATIONS:

SAE 75W-80

API GL-4

#### DESCRIPTION:

Used in modern mechanical transmissions of passenger cars and trucks, differentials, transfer cases, and other units, where the use of transmission oil of API GL-4 grade is recommended.

Produced of high-quality base oils with modern additives package.

#### BENEFITS:

- Good lubrication and easy cold start including at low temperatures throughout the service life;
- Excellent frictional properties ensure smooth gear change and quiet operation;
- Consistently high performance in various operating modes;
- A high level of wear protection within a wide load range;
- Has increased oil drain period due to the high thermal stability.

#### TYPICAL CHARACTERISTICS:

Kinematic viscosity at 100°C, mm <sup>2</sup> /s	15.5
Density at 20°C, kg/m <sup>3</sup>	889
Viscosity index	140
Flash point in open crucible, °C	210
Pour point, °C	-30
