

YUKO GREASE 158

SPECIAL LUBRICANT.

SPECIFICATIONS:

NLGI 2

DESCRIPTION:

Lubricant 158 (lithium) is intended for lubrication of rolling bearings of electrical equipment, cross bearings of cardan joints, friction nodes of windshield wipers of cars and trucks, other types of transport.

BENEFITS:

- It has good anti-wear and anti-corrosion properties;
- Maintains performance in a wide range of temperatures;
- Has excellent mechanical and thermal stability;
- The color of the lubricant serves as an indicator;
- Does not contain lead or other harmful metals.

TYPICAL CHARACTERISTICS:

Dropping Point, °C	170
Penetration at 25°C, mm•10-1	275
Colloid stability, %, not more	15
Tensile strength at 20°C, Pa	210
Critical load	617
