

YUKO LZ-TSNII

SPECIAL RAILWAY LUBRICANT.

SPECIFICATIONS:

NLGI 3

DESCRIPTION:

It is used for cylindrical roller bearings, improving their working conditions.

Produced from a mixture of mineral oils, as a result of which the lubricant has excellent low-temperature properties that allow it to work in friction nodes in extreme conditions up to the temperature of -60 ° C. The complex of anti-seize and antioxidant additives included in the composition of the lubricant contributes to the formation of a film that reduces critical loads and wear intensity, and, to a large extent, prevents seizing at extremely high loads.

BENEFITS:

- A complex of anti-seize and antioxidant additives;
- Withstands increased critical loads;
- Reduces the intensity of wear;
- Prevents seizing at extremely high loads.

TYPICAL CHARACTERISTICS:

Appearance	homogenous salve of yellow colour
Efficient viscosity at 0 °C, Pa • s-1, no more	398
Tensile strength at 20°C, Pa	370
Dropping point, °C	140
Colloid stability, %, not more	20
Evaporation	2,3
Penetration at 25°C, mm×10 ⁻¹	240

Packing	Vendor code	Barcode
Barrel 200l	010047	482007024471
Bucket tin 17kg	010946	482007024472
