

OPTIMA GP (NLGI 1)

UNIVERSAL ALL-SEASON LUBRICANT FOR INDUSTRIAL AND AUTOMOBILE TRANSPORT.

SPECIFICATIONS:

NLGI 1

DESCRIPTION:

Designed for lubrication of friction units of all types: rolling and sliding bearings (including those with sealing washers), hinges, guides, gears of industrial and other equipment, working with an extension of the service life, operable at temperatures from minus 30 ° C to plus 150 °C (short-term up to 170 °C).

BENEFITS:

- Protects from wear;
- Guarantees excellent protection against the appearance of rust when exposed to water, snow and chemical reagents;
- Maintains mechanical and temperature stability;
- Reduces friction and ensures smooth operation of the mechanism.

TYPICAL CHARACTERISTICS:

Thickening agent	calcium
Penetration at +25° C , mm•10-4	220
Efficient viscosity at -20 °C, Pa • s-1, not more then	1500
Evaporation	0,48
Dropping point, °C	220
Colloid stability,%, not more	18
Weld Point Test, H	2195

Packing	Vendor code	Barcode
Barrel 200l	013968	482007024813
