

YUKO I-20A

INDUSTRIAL SPECIAL OIL.

SPECIFICATIONS:

ISO 32

DESCRIPTION:

It is used as working fluids in hydraulic systems of machine tools, automatic lines, presses, for lubrication of light and medium-loaded gears, rolling and sliding guides of machine tools, where special oils are not required.

General-purpose oil, distillate or a mixture of distillate with residual from sulfurous and low-sulfur oils of selective purification. Contains no additives. I-20A oil is used in hydraulic systems of industrial equipment, for construction, road and other machines working outdoors.

* According to TS, in the period from April to September, the freezing temperature can vary no higher than minus 10°C.

BENEFITS:

- Ensures reduction of friction and wear of contacting parts;
- Removes heat from friction nodes;
- Protects parts from corrosion;
- Cleans friction surfaces from dirt;
- Sealing agent.

TYPICAL CHARACTERISTICS:

Kinematic viscosity at 40 °C, mm ² /s	29.5
Density at 20°C, kg/m ³	872
Acid index, mg KOH/g max	0,03
Flash point in open crucible, °C, min	205
Pour point, °C	-15

Packing	Vendor code	Barcode
Barrel metal 200l	000314	482007024113
Canister plastic 20l	005267	482007024075
