YUKO HA-30(ISO 22)

OIL FOR REFRIGERATING MACHINES.

SPECIFICATIONS:

ISO 22

DESCRIPTION:

Used for lubrication of refrigerating machines compressors, operating on ammonia and carbon dioxide.

It is a completely soluble with R12 coolant in rated operating conditions of refrigerating machinery, the blend formed in this case represents a homogeneous medium, which completely returns to the compressor and provides its proper lubrication. Flocculation temperature in R-12 refrigerant solution is minus 35°C. While in operation, blend forms rather thick oil film on the friction surfaces.

BENEFITS:

TYPICAL CHARACTERISTICS:

Flash point in open crucible, °C

Acid index, mg KOH/g

Pour point, °C

Ash content, %

Kinematic viscosity at 50°C, mm²/s 30.1

- High oxidation stability, allows using the oil over a long period of time;
- Prevents sludge and deposits formation, which can cause problems, associated with deposits formation on valves, in recirculation and filtering systems;
- No effect on seal materials.
