

YUKO MARK A (HV 32)

HYDRAULIC OIL.

SPECIFICATIONS:

ISO 32

ISO HV

DIN HVLP

DESCRIPTION:

It is used for all-season operation in torque converters and automatic transmissions of trucks and buses of domestic production, as well as in hydrostatic drives of self-propelled agricultural and other machinery.
Made from high-quality base oils.

BENEFITS:

- Protects hydraulic drive parts from corrosion;
- Has good antifoam properties;
- Ensures stability of viscosity-temperature characteristics in the entire range of operating temperatures;
- Has good dispersing properties and chemical stability, preventing the formation of precipitation and varnish deposits on the surfaces of hydraulic system parts;
- Ensures minimal wear of rubbing parts throughout the entire service life;
- Compatible with all rubber seals in the hydraulic system.

TYPICAL CHARACTERISTICS:

 Kinematic viscosity at 40 °C, mm²/s 42.8

 Density at 20°C, kg/m³ 881

Flash point in open crucible, °C, min 200

Pour point, °C -40

Packing	Vendor code	Barcode
Barrel metal 200l	001781	482007024039
Canister plastic 20l	005318	482007024103
